

Major Contracts Derecktor 197' & 262'

Derecktor Shipyards introduced their 197' and 262' build projects at the 2005 Fort Lauderdale Boat Show. Azure Naval Architects of the Netherlands designed both the 197' and 262' with striking lines, high bow sections and sleek superstructures, features which offer maximum sea-keeping abilities. Both have an ample number of watertight bulkheads; protected anchoring compartments located on the 'tweendecks; isolated equipment and machinery; and extremely long range due to large tanks and extensive space for storage. Both have efficient propulsion systems and powerplants. They are fully Lloyds classed and MCA-compliant.

The 197's accommodations include a large private owner's suite that includes a second stateroom as well as six large ensuite guest staterooms. Her full-beam superstructure maximizes interior space. Covered space is provided for two large tenders, PWCs and other small craft. Crew accommodations include eight double staterooms. Twin 2000-hp CAT 3516B engines deliver a top speed of 16 knots, a cruising speed of 13 knots and a 6000-nautical-mile range.

The 262's interior was designed with comfort and adventure in mind. A main feature is the owner's private panoramic suite with a lounge and forward observation deck. A theater, gym with sauna, two lounges, dining room, lavish galley and three pantries cater to the owner's needs. A five-deck elevator connects each level. There is room for stowing two 30' tenders, PWCs, small boats and gear. Twin 2200-hp MTU 16V400 engines deliver a top speed of 17.5 knots, a cruising speed of 13 knots and a 7500-nautical-mile range.
